### DETAILED ACTION

1. Applicant's amendment, filed 1/20/04, has been entered.  
Claims 1-22 and 31-45 have been canceled.

Claims 23-30 are pending.

2. The following is noted: The instant claims encompass methods of treating Crohn's disease by administering cyclosporine in combination with "a TNF antagonist". The instant claims as well as the instant specification encompass various distinct molecules such as anti-TNF antibodies, TNF receptors / fusion proteins and phosphodiesterase inhibitors, for example. The examiner notes that these molecules do not share a substantial structural feature essential to a common utility.

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 24-25; drawn to methods of treating Crohn's disease with cyclosporin and anti-TNF antibodies, classified in Class 424, subclass 130.1.

- II. Claims 26-27; drawn to methods of treating Crohn's disease with cyclosporin and TNF receptor / fusion proteins antibodies, classified in Class 424, subclass 133.1.

- III. Claims 29-30; drawn to methods of treating Crohn's disease with cyclosporin and phosphodiesterase inhibitors, classified in Class 514, subclass 256.

4. Inventions I-III are directed to related methods of treating Crohn's disease with TNF antagonists in combination with cyclosporin.

The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Inventions I-III are different methods, which require patentably distinct ingredients, method steps and endpoints. These methods rely upon inducing agents that differ in structure, functional properties and modes of action. Also, it is noted that these molecules do not share a substantial structural feature essential to a common utility.

Therefore, they are patentably distinct.

Art Unit: 1644

5. Claims 1 and 28 link inventions I-III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), 1 and 28. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104. Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

6. Because these inventions are distinct for the reasons given above and the search required for any Group from Groups I-III is not required for any other group from Groups I-III and Groups I-III have acquired a separate status in the art because the searches are not co-extensive and encompass divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
